Problem Statement

Developing a Conversational AI platform that enables users to plan and visualize the interior design of their homes effectively

Need for PS

- Designing the Interiors is complex and time comsuming
- Facing issues in hiring interior designers
- Difficult to develop aesthetically pleasing living spaces

Features

Generative AI

- User will be able to write their desired design via prompts

Track Progress

- Dashboard having all the projects to track the progress

Object Detection

- Objects detected from design generated later used for recommendation

Easy changes

- Easy to revise design changes

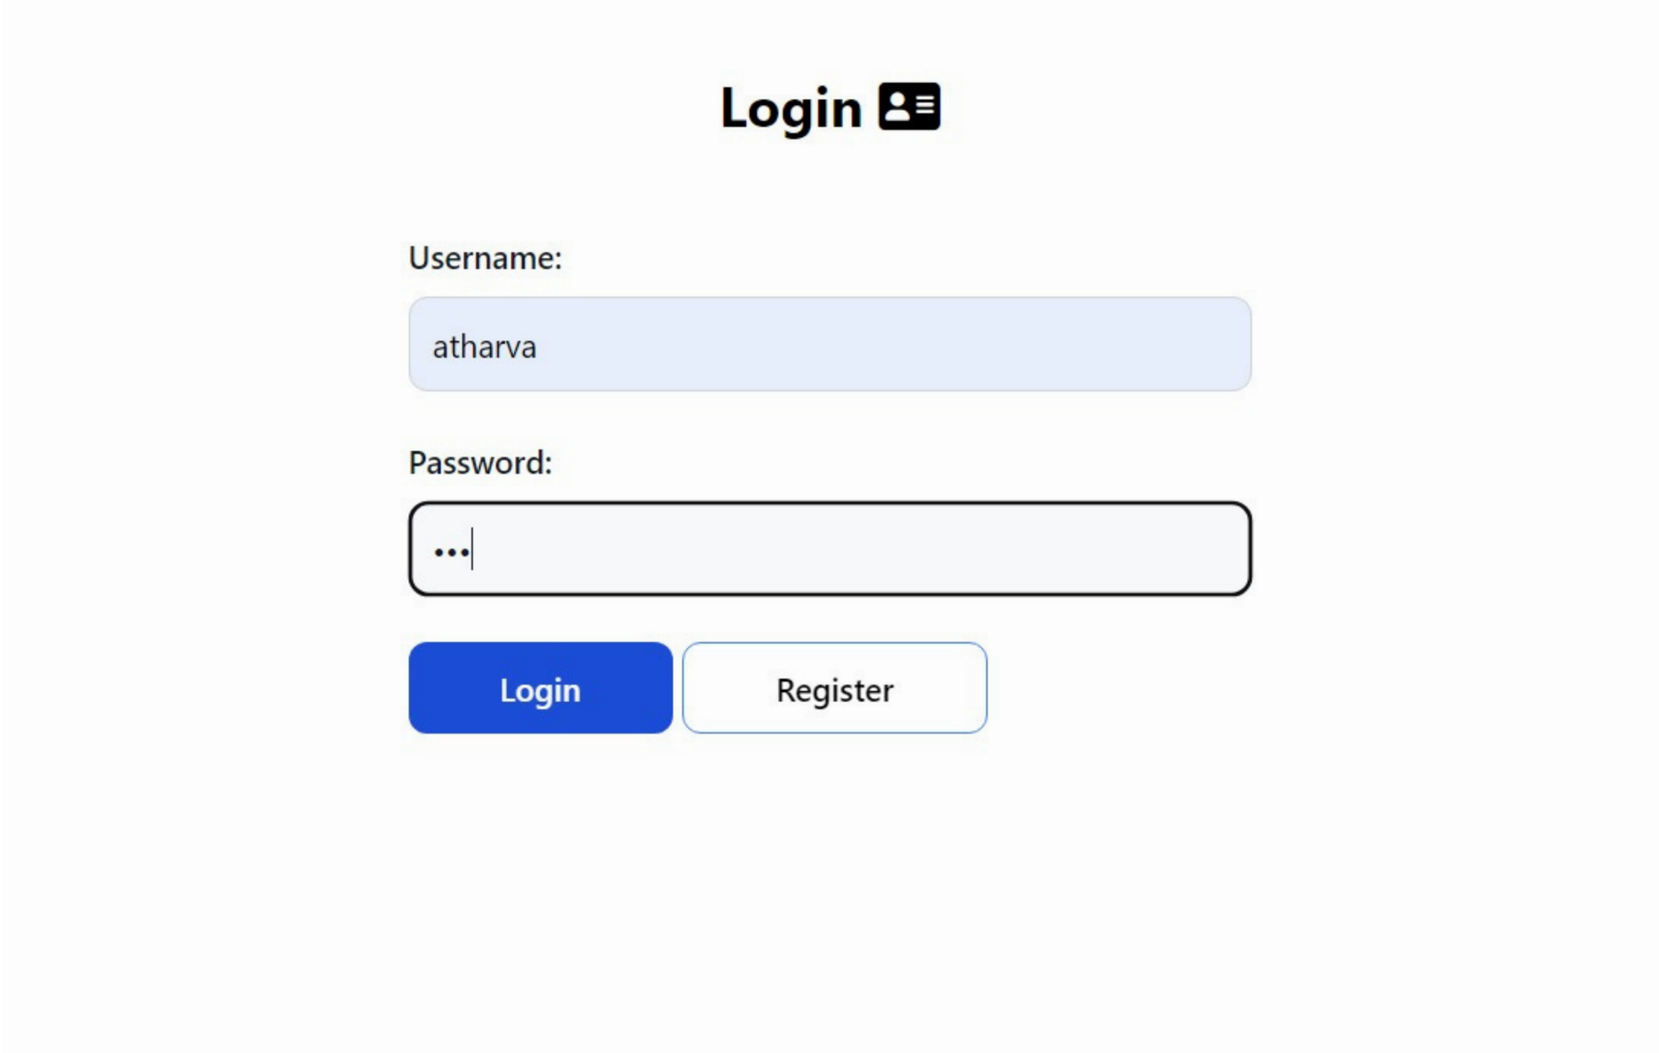

Bugeting & Recommendations

- Each object estimated budget and similar recommendations

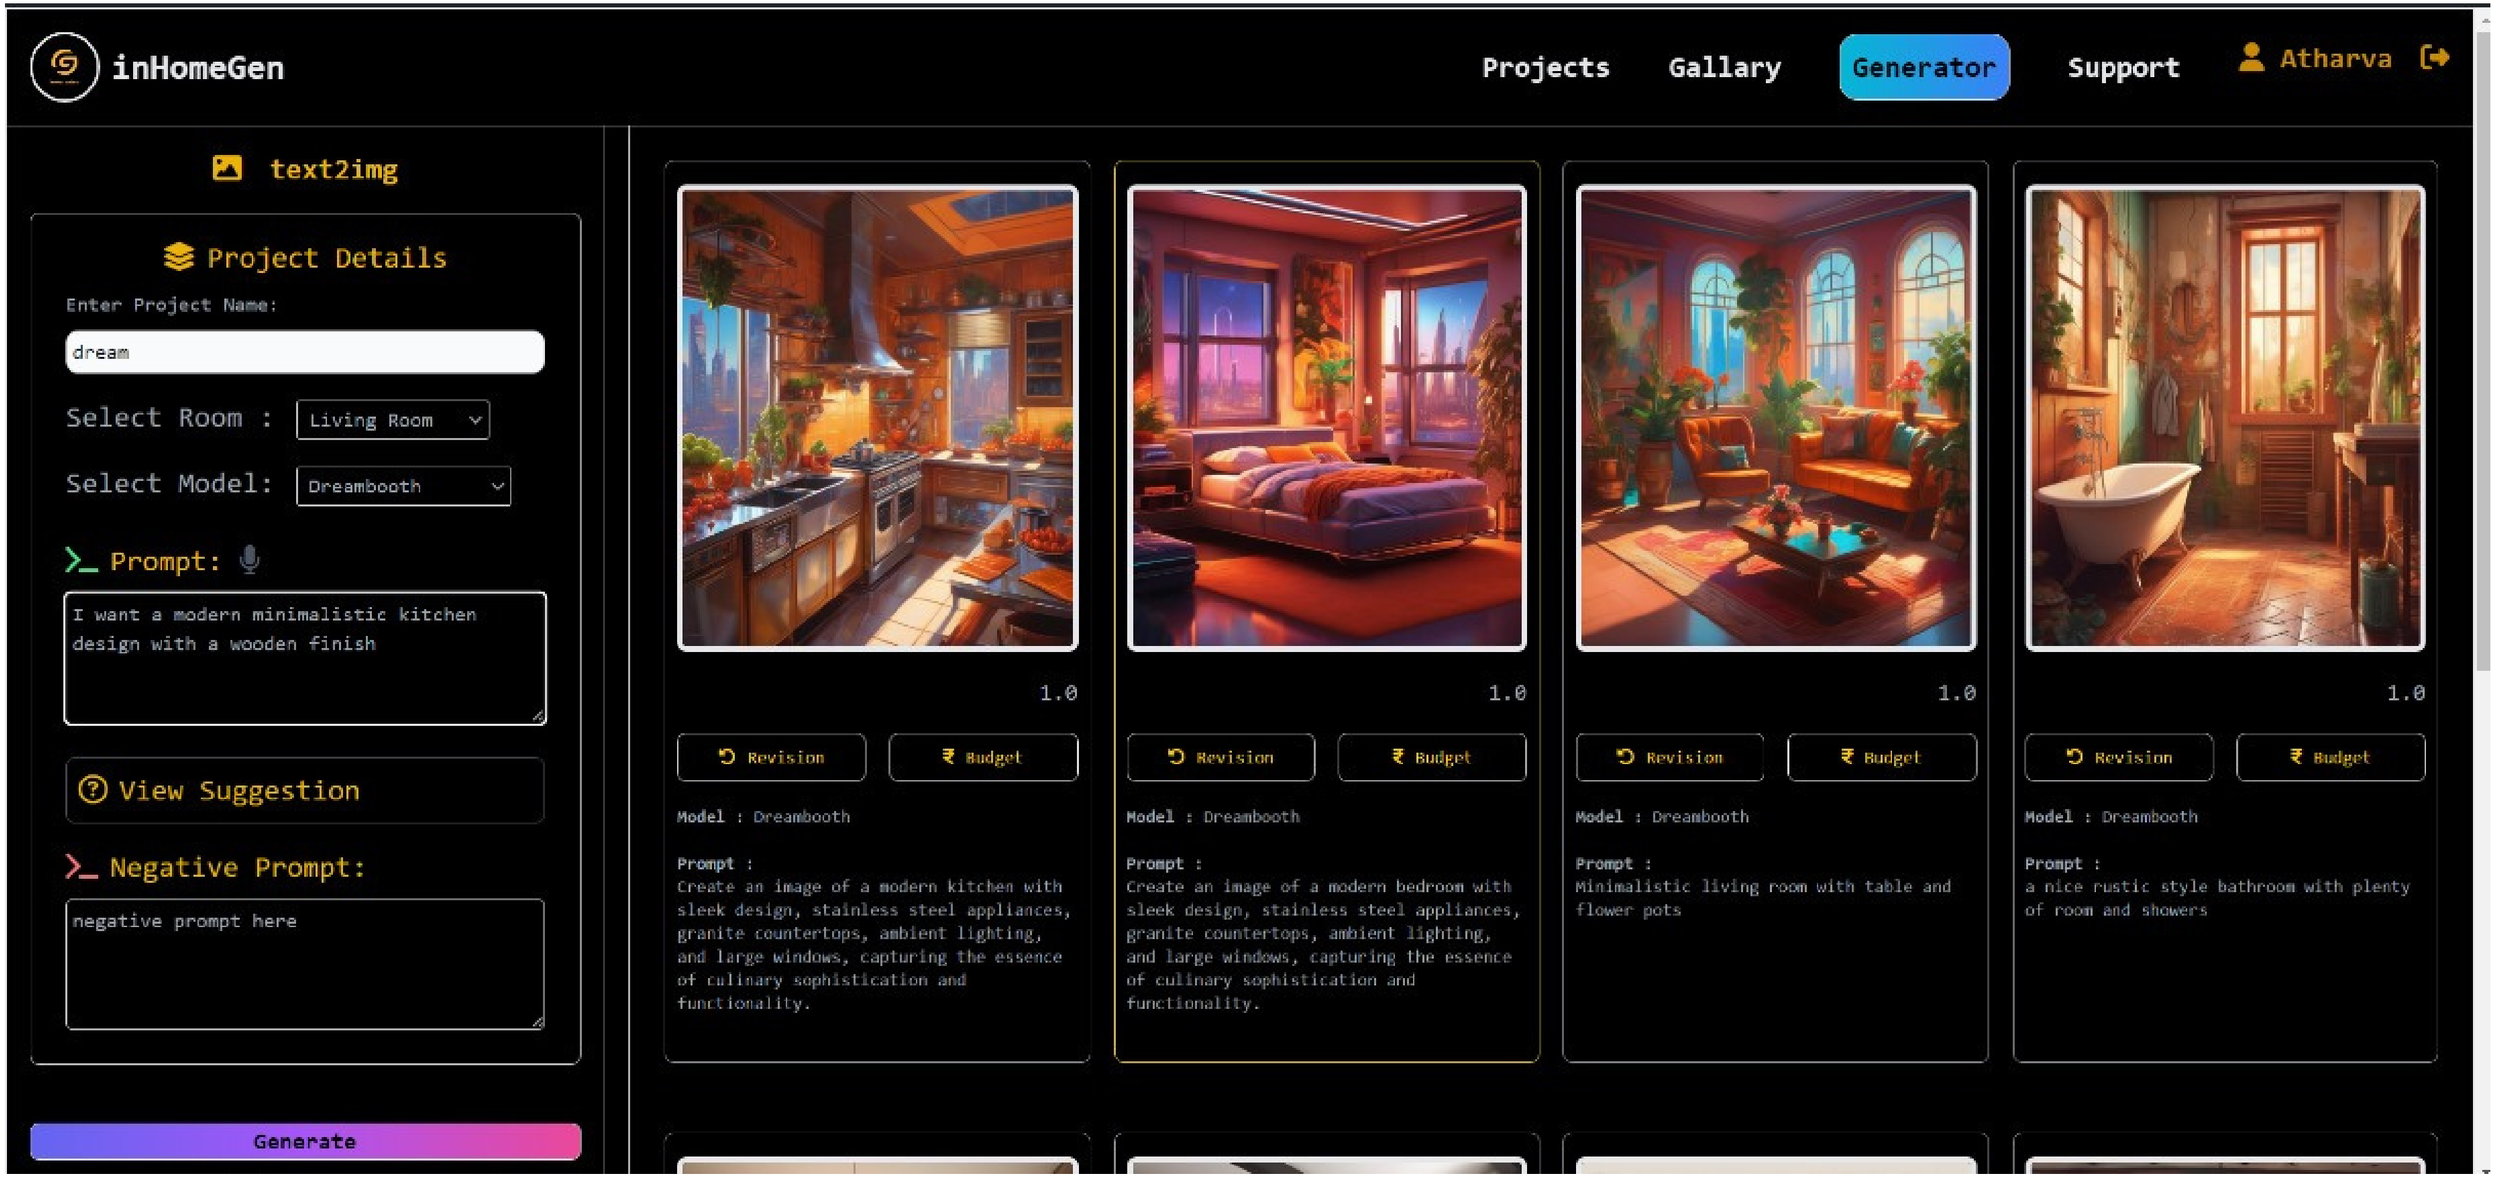

Voice Input

- Prompts can be given over voice too
